CHOOSING THE RIGHT SOLVER EXTerior COLOURS

Creating the perfect colour scheme for your home has never been easier with the wide range of colours from Solver.

With over 90 years of experience in paint and colour, you can trust Solver to protect your home from the harsh Australian weather conditions, whilst creating a picture perfect exterior that will last for many years to come.

COLOUR INSPIRATION

Exterior colour schemes need to complement your home’s architecture and surroundings. Solver has sourced a number of stunning exteriors in a variety of architectural styles designed to provide you with inspiration for your own colour scheme.

We have arranged our most popular exterior colours into easy to use colour palettes. Select your personal favourites to complement your home’s surroundings and reflect your style.

HOW TO USE THIS CARD

Solver has made choosing your perfect exterior colour scheme easy for you. Choose the colour palette or house image that appeals most to you. Each palette has been laid out in a range of popular light to dark colours which are suitable for exterior walls and architectural features.

Soft neutrals and dark grey tones for trims are currently the most popular exterior colours. These popular colour palettes will help you create a stylish exterior.

COLORBOND® COLOURS

Solver has selected four Colorbond® colours at the bottom of each palette for you to use on your roof, window, door and trim areas. These colours have been designed to complement other colours in the palette.

TESTING YOUR COLOUR CHOICE

A sample pot is the perfect way to confirm your final colour choice. Brush out one square metre of paint and view your colour at different times of the day. Before making your final colour choice, check that it co-ordinates with roof and trim colours.
Stony, natural colours work well on all house styles. Use different shades of the same colour for a seamless look to your exterior.

```
COORDINATING COLORBOND® COLOURS

Colorbond® Dune SF6-060 / 23-30B
Colorbond® Sandbank SC6-060 / 18-40D
Colorbond® Woodland Grey SF6-030 / 26-50E
Colorbond® Plantation SE2-010 / 26-60D
```

HINT
Use light and white colours to make a building look larger and accentuate architectural features.
Blues

Tranquil blue colours are perfect for trims and accents of traditional homes, or try a blue mid tone for modern, rendered homes.

**HINT**
Always check the weather forecast before you start painting exteriors. Avoid painting in very high or low temperatures.
**GREENS**

Soft, natural shades of green are a sophisticated choice for both modern and traditional homes. They combine well with cream or charcoal accents.

**HINT**

Always ensure your exterior is properly prepared before you start painting. This will ensure a smoother and longer lasting paint finish on your home.

REDs, ORAnGES & YEllOWs

The earthy hues of nature harmonise well with soft creams and honey tones. Use rich tones for front doors and architectural features.

HINT

Always remember to consider your roof colour when painting your home. Paint doesn't need to match the roof, but it does need to work harmoniously within your colour scheme.
**PURPLES & PINKS**

Classic purples and elegant shades of pink are popular for modern homes. Use bright colours sparingly, on larger areas use more muted tones. They work well in combination with grey neutrals.

**HINT**

Look at house styles and colours in your street to get ideas on what might work best for your home.
OUTDOOR ENTERTAINING

Outdoor rooms are the perfect place to experiment with bold colours and fashionable shades. Pick a colour and then use outdoor accessories such as cushions to co-ordinate.

**HINT**

A lower gloss paint will hide surface imperfections and is especially suited to brick or uneven render work.
