

## Now you can have the performance of a traditional enamel with all the convenience of water based....

SOLVER Aqua Trim acrylic enamel is an ultra premium quality interior and exterior 100% acrylic wall and trim paint, formulated to provide a durable, non yellowing finish with the speed and ease of application of a water-borne product. Available in Satin & Gloss finishes, Solver Aqua Trim is a low odour and low environmental impact alternative to traditional oil based enamel finishes.

### Key Features:

- Low odour.
- Suitable for Interior / Exterior use.
- Non-yellowing.
- Low environmental impact.
- Re-coatable within 2 hours.
- Easy application.
- Flows out to give a smooth even finish.
- Water clean-up.
- Formulated to prevent painted surfaces sticking together.
- Contains less than 45 g/litre of VOCs (Volatile Organic Compound) which is approximately eight times less than traditional enamels and well below the APAS\* VOC specification limits. The VOC content of Solver Aqua Trim is also below Green Building Council Australia specification limits.

When used in combination with the Maxi Enviroguard range of broad-wall finishes, Solver Aqua Trim water based acrylic enamels form part of the system of choice for Green Star construction.

Available in both satin and gloss sheen levels, Solver Aqua Trim water based acrylic enamels can be tinted to an extensive range of colours.

For more information on Solver Aqua Trim acrylic enamels, contact your local Solver sales representative or visit your nearest Solver Decorator Centre or Distributor.
