

# Solver Introduces an Environmentally Friendly Bag

Lightweight plastic shopping bags have been an environmental issue for many years with many ending up in landfill, stormwater and eventually our oceans.

In South Australia alone, this equates to an estimated 400 million bags a year.

The South Australian Government recently passed legislation banning the use of lightweight, checkout-style plastic shopping bags.

With the environment in mind, Solver Paints are pleased to announce the introduction of re-usable Solver shopping bag for sale through Solver Decorator Centres.
