

# Ecotint

**Love the colour. Love the environment.**

Ecotint is an eco-friendly, low environmental impact, machine tinting system.

When used in conjunction with Solver Maxi Enviroguard, it will not increase the VOC content of the paint, making it safer and cleaner to use.

Now you can achieve the colour you want, and still be green.

| Maxi-Enviroguard Range                    | Green Building Council Australia Maximum VOC Content | APAS* Maximum VOC Content | Maxi Enviroguard VOC Content |
|---|--|---------------------------|------------------------------|
| Maxi Enviroguard Matt                     | 16 g/litre   | 5 g/litre                 | < 1 g/litre                  |
| Maxi Enviroguard Low Sheen                | 16 g/litre   | 5 g/litre                 | < 1 g/litre                  |
| Maxi Enviroguard Semi Gloss               | 16 g/litre   | 5 g/litre                 | < 1 g/litre                  |
| Maxi Enviroguard Ceiling Flat             | 14 g/litre   | 5 g/litre                 | < 1 g/litre                  |
| Maxi Enviroguard Acrylic Sealer Undercoat | 65 g/litre   | 5 g/litre                 | < 1 g/litre                  |
| Aqua Trim Acrylic Enamel Gloss            | 75 g/litre   | 90 g/litre                | < 45 g/litre                 |
| Aqua Trim Acrylic Enamel Satin            | 75 g/litre   | 80 g/litre                | < 45 g/litre                 |

\* APAS = Australian Paint Approval Scheme
